# waterfalls

I don't think I will ever get a full understanding of the popularity of font waterfalls. But they are traditional and cool. Presented here are waterfalls for No 1, No 2, and Kondenst and Poster.

### What is the Interrobang?

The interrobang is a combination of the question mark or interrogative point and the exclamation point or bang, in print industry jargon. In 1966, American Type Founders included the new glyph in their release of

the font Americana. The interrobang is unicode UNI203D. It is a nonstandard punctuation mark denoting a mix of query and interjection. Recently, the interrobang was added to Linotype's Pro European Open-Type character set World Glyph Set One or W1G.
